

Random Number Generator Certificate

Software provider: GI Tech Gaming Company India Private Limited
Software provider URL: www.gitechgames.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) by GI Tech Gaming Co India Private Limited and found that the RNG complies with the relevant standards.*

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has also evaluated scaling for Lotto, Pick 3 and Keno games.

The scaling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

iTech Labs Australia
Date: 16 February 2017

*The RNG was tested according to UK Gambling Commission standards- Remote gambling and software technical standards July 2015.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
